A NEW PAIR OF GLASSES

@SPACEYTALES

watcha up to Earth?

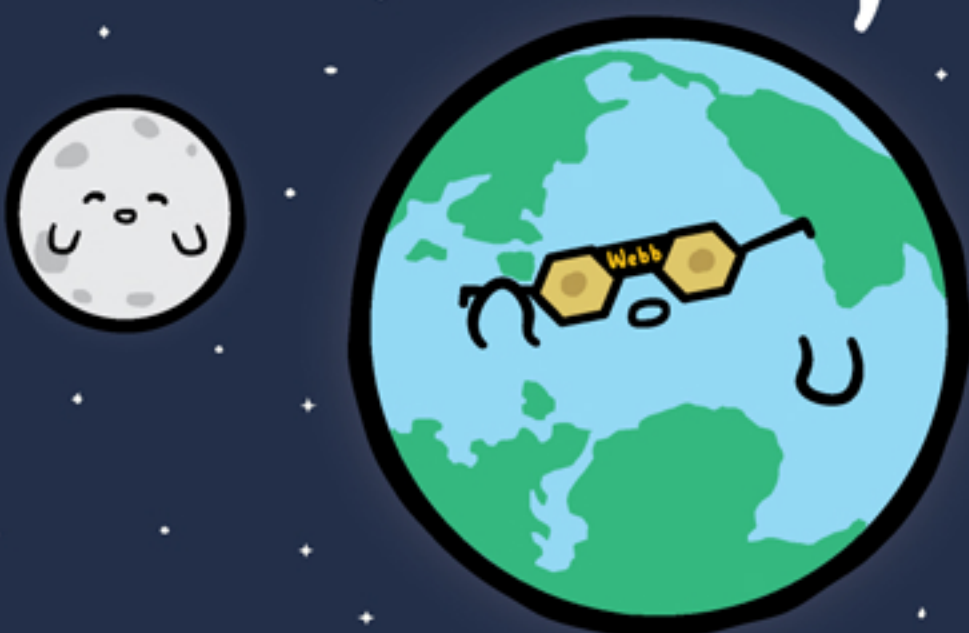

just looking at stars and stuff, can't see far enough tho

here try these on

WOAH... i can see like a 100 times further!

DID YOU KNOW?

The James Webb Space Telescope (sometimes called Webb) will be the largest telescope ever placed in space: 100 times more powerful than Hubble. The telescope will be launched in 2021 and will be the premier space observatory of the next decade!
